

## **Machinist / Model Maker**

We are an engineering and technology company providing product development, engineering services, and prototyping in a broad range of industries. RPM Tech provides an exciting, technically challenging, and creative environment for motivated individuals. We are seeking a Machinist to support our product development needs and serve our expanding customer base.

### **Summary of Position:**

The successful candidate will be responsible for fabrication, prototyping, assembly, testing, inspection and support tasks for a variety of products, incorporating various materials and finishes. The candidate will have the opportunity to experiment with new processes and develop the model shop. This is a full-time position.

### **Primary Responsibilities:**

- Mechanical fabrication using 3D models and 2D prints: sheet metal; manual and CNC mill programming & machining; manual lathe turning;
- Mechanical assembly and testing
- Inspection of parts and assemblies
- Ordering materials, tooling, and supplies

### **Qualifications:**

- Demonstrated ability to perform some or all of the primary duties listed above, typically acquired through training and three or more years of experience.
- Prototyping and machining experience required
- Must be able to read engineering drawings
- Soldering experience a strong plus
- MIG and TIG welding; finishing (painting, coating) experience preferred.
- Basic computer skills expected (Microsoft Excel, Word, internet search ability)
- Good personal organization skills with the ability to work independently.
- Some experience in a new product development or manufacturing environment would be ideal.
- Must be motivated and willing to learn new technologies, work efficiently in a team environment.

The position is based in our Forest Hill, MD design headquarters. On-site presence is required. Benefits package includes paid time off, medical, dental, vision, disability, life insurance, and matching 401k.
